S.No: 15	Exp. Name: *Sample program on method overriding*	Date:2023-10-15

Aim:

Write a program on method overriding

Source Code:

Bike.java

```java
class Vehicle{
      void run(){
            System.out.println("Bike is good");
      }
}
class Safe extends Vehicle
{
      void run()
      {
            System.out.println("Bike is running safely");
      }
}
class Bike
{
      public static void main(String args[])
      {
            Vehicle obj=new Safe();
            obj.run();
      }
}
```

Execution Results - All test cases have succeeded!

Test Case - 1
User Output
Bike is running safely
